

# Is a perfect lawn REALLY worth the risk?

To our **WILDLIFE**

- **There are many documented bird kills: “When it comes to pesticides, birds are sitting ducks!”**  
~ Smithsonian Migratory Bird Center
- **Amphibians are very sensitive to pesticides**
- **Many kinds of wildlife are smaller than human adults so there is a disproportional impact**
- **Pesticides hurt pollinators – and we depend on pollinators for 1/3 of our food supply!**
